Profile

Product-focused **Full-Stack Developer** with a background in medicine. An independent individual contributor skilled at working autonomously, and delivering high-impact, user-centric applications. Flexible and driven by outcomes, with hands-on experience building and scaling products using the **MERN stack**, **Next.js**, as well as integrating real-time systems via WebRTC and WebSockets.

Experience

- Full-Stack Web Developer**
LiteSpace, Remote
- Oct 2024 to Oct 2025
- Implemented a 1-on-1 real-time chat system using WebSockets for tutor-student communication and engagement.
 - Led the redesign of mobile layout and navigation flow, improving user experience and increasing session bookings by **40%**.
 - Directed pricing model transformation from concept through execution and UI redesign effectively avoiding high operational costs.
 - Developed analytics dashboards to track lesson attendance, providing data-driven insights for performance monitoring.
 - Contributed to optimizing video call quality through UI adjustments, and layout improvements, reducing user complaints and improving session reliability.

Projects

- El-Ameed LMS**
Next.js, Tailwind CSS, Prisma, PostgreSQL, Zustand
- [Live](#) [Github](#)
- Developed core LMS features including secure video hosting, exam creation, grading, and performance tracking.
 - Scaled the system to accommodate **250+ active students** with stable performance.
 - Built a gamified competition system with leaderboards and a points-based ranking mechanism.
 - Integrated WhatsApp notifications for parents to receive automated updates on student progress.
- AI 3D Virtual Patient Simulator**
Next.js, Three.js, Tailwind CSS
- [Github](#)
- Integrated realistic 3D characters with lip-sync and animation using Three.js and Rhubarb for immersive patient simulations.
 - Integrated Gemini 2.5 and Text-to-Speech APIs to enable natural real-time dialogue with virtual patients.
 - Designed adaptive AI personas and multiple clinical case scenarios for dynamic OSCE training.
 - Built a feedback and scoring system to assess student performance against standardized OSCE checklists.
 - Conducted a 3-month pilot with **200+ students**, improving confidence and diagnostic reasoning through interactive, AI-driven scenarios.

Education

- Brooklyn Business School**
MBA; Healthcare Management
- Cairo, Egypt
Mar 2025 – Present
- Tanta University, Faculty of Medicine**
MBBS; Medicine
- Tanta, Egypt
Sep 2019 – Mar 2027

Skills

- Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS
- Backend: Node.js, Express.js, Prisma, Knex, MongoDB, PostgreSQL
- Tools: Git, GitHub Actions, CI/CD, Firebase, Jest, Docker, Vite
- Systems: WebRTC, WebSockets, Payment Integration, REST APIs
- Other: Product analytics, Figma collaboration, Notion

Languages

Arabic (Native), English (Proficient, B2)
